Answering Unsaid Questions

Audience members have many **questions** about your presentation that will **never be said out loud**

Answering Unsaid Questions

Audience members have many **questions** about your presentation that will **never be said out loud**

- What are you going to talk about?

Answering Unsaid Questions

Audience members have many **questions** about your presentation that will **never be said out loud**

- What are you going to talk about?
- Why should I listen to you?

Answering Unsaid Questions

Audience members have many **questions** about your presentation that will **never be said out loud**

- What are you going to talk about?
- Why should I listen to you?
- What new thing are you proposing?

Answering Unsaid Questions

Audience members have many **questions** about your presentation that will **never be said out loud**

- What are you going to talk about?
- Why should I listen to you?
- What new thing are you proposing?
- What do I need to know to understand the topic?

Answering Unsaid Questions

Audience members have many **questions** about your presentation that will **never be said out loud**

- What are you going to talk about?
- Why should I listen to you?
- What new thing are you proposing?
- What do I need to know to understand the topic?
- What has already been done?

Answering Unsaid Questions

Audience members have many **questions** about your presentation that will **never be said out loud**

- What are you going to talk about?
- Why should I listen to you?
- What new thing are you proposing?
- What do I need to know to understand the topic?
- What has already been done?
- What did you create?

Answering Unsaid Questions

Audience members have many **questions** about your presentation that will **never be said out loud**

- What are you going to talk about?
- Why should I listen to you?
- What new thing are you proposing?
- What do I need to know to understand the topic?
- What has already been done?
- What did you create?
- How well does it work?

Answering Unsaid Questions

Audience members have many **questions** about your presentation that will **never be said out loud**

- What are you going to talk about?
- Why should I listen to you?
- What new thing are you proposing?
- What do I need to know to understand the topic?
- What has already been done?
- What did you create?
- How well does it work?
- What do the results mean?

Structuring a Presentation

Presentations should have an **intuitive flow**

Structuring a Presentation

Presentations should have an **intuitive flow**, just like the paper they are about...

Structuring a Presentation

Presentations should have an **intuitive flow**, just like the paper they are about...

So structure it similar to your paper:

Structuring a Presentation

Presentations should have an **intuitive flow**, just like the paper they are about...

So structure it similar to your paper:

- Introduction
 - Motivation/Hook
 - Contributions

Structuring a Presentation

Presentations should have an **intuitive flow**, just like the paper they are about...

So structure it similar to your paper:

- Introduction
 - Motivation/Hook
 - Contributions
- Background and Related Work
 - Important information to help understand
 - Potentially what other people have done

Structuring a Presentation

Presentations should have an **intuitive flow**, just like the paper they are about...

So structure it similar to your paper:

- Introduction
 - Motivation/Hook
 - Contributions
- Background and Related Work
 - Important information to help understand
 - Potentially what other people have done
- Methodology and Architecture
 - What you built
 - How you are going to test it

Structuring a Presentation

Presentations should have an **intuitive flow**, just like the paper they are about...

So structure it similar to your paper:

- Introduction
 - Motivation/Hook
 - Contributions
- Background and Related Work
 - Important information to help understand
 - Potentially what other people have done
- Methodology and Architecture
 - What you built
 - How you are going to test it
- Results
 - Show and describe
 - Analyze

Structuring a Presentation

Presentations should have an **intuitive flow**, just like the paper they are about...

So structure it similar to your paper:

- Introduction
 - Motivation/Hook
 - Contributions
- Background and Related Work
 - Important information to help understand
 - Potentially what other people have done
- Methodology and Architecture
 - What you built
 - How you are going to test it
- Results
 - Show and describe
 - Analyze
- Conclusions
 - Restate important points

Giving a Presentation

Understand the **audience** that you are presenting to

Giving a Presentation

Understand the **audience** that you are presenting to

- Informs what **information** is in the presentation
- Informs **how you give** the presentation

Giving a Presentation

Understand the **audience** that you are presenting to

- Informs what **information** is in the presentation
- Informs **how you give** the presentation

Giving a Presentation

The slides are there to **assist YOU and the audience**

Giving a Presentation

The slides are there to **assist YOU and the audience**

- **No one** wants to read your slides (including you)

Giving a Presentation

The slides are there to **assist YOU and the audience**

- **No one** wants to read your slides (including you)
- Put the **most important** information
Not **useless** information

Giving a Presentation

The slides are there to **assist YOU and the audience**

- **No one** wants to read your slides (including you)
- Put the **most important** information
Not **useless** information
- Your slides should **lead** the audience
Not **bore** the audience

Giving a Presentation

The slides are there to **assist YOU and the audience**

- **No one** wants to read your slides (including you)
- Put the **most important** information
Not **useless** information
- Your slides should **lead** the audience
Not **bore** the audience

Giving a Presentation

Know that there is a **time limit**

Giving a Presentation

Know that there is a **time limit**

- You have to give the presentation
AND
- Leave time for questions

Giving a Presentation

Know that there is a **time limit**

- You have to give the presentation
AND
- Leave time for questions

Typically you have 10 to **15 minutes**

Giving a Presentation

Know that there is a **time limit**

- You have to give the presentation **AND**
- Leave time for questions

Typically you have 10 to **15 minutes**

- Use 10-12 for presentation
- Use 3-5 for questions

Giving a Presentation

Answer questions before that are asked

Giving a Presentation

Answer questions before that are asked

- Think about **questions** the audience **will ask** when creating your slides
- **Answer** those questions **in the slides**

Giving a Presentation

Answer questions before that are asked

- Think about **questions** the audience **will ask** when creating your slides
- **Answer** those questions **in the slides**
- Hard to do, but it's a nice touch

Giving a Presentation

Find your presentation **style**

Giving a Presentation

Find your presentation **style**

- Mine is mostly off the cuff with planned jokes
 - Practice but don't memorize

Giving a Presentation

Find your presentation **style**

- Mine is mostly off the cuff with planned jokes
 - Practice but don't memorize
- You can be more rigid
 - Memorize what you need to say

Giving a Presentation

Find your presentation **style**

- Mine is mostly off the cuff with planned jokes
 - Practice but don't memorize
- You can be more rigid
 - Memorize what you need to say

Giving a Presentation

Find your presentation **style**

- Mine is mostly off the cuff with planned jokes
 - Practice but don't memorize
- You can be more rigid
 - Memorize what you need to say

Thats me!!!

Giving a Presentation

Find your presentation **style**

- Mine is mostly off the cuff with planned jokes
 - Practice but don't memorize
- You can be more rigid
 - Memorize what you need to say

Thats me!!!

Giving a Presentation

Find your presentation **style**

- Mine is mostly off the cuff with planned jokes
 - Practice but don't memorize
- You can be more rigid
 - Memorize what you need to say

Thats me!!!

You can tell because bald

Giving a Presentation

Find your presentation **style**

- Mine is mostly off the cuff with planned jokes
 - Practice but don't memorize
- You can be more rigid
 - Memorize what you need to say
- You don't have to be 100% professional
 - Make them remember you
 - Make them remember your presentation

Giving a Presentation

Find your presentation **style**

- Mine is mostly off the cuff with planned jokes
 - Practice but don't memorize
- You can be more rigid
 - Memorize what you need to say
- You don't have to be 100% professional
 - Make them remember you
 - Make them remember your presentation
- Make sure to practice timing
 - You only get 10 to 15 minutes

In Conclusion

- **Structure** your presentation like your paper

In Conclusion

- **Structure** your presentation like your paper
- **Lead** your audience, **don't read** your audience

In Conclusion

- **Structure** your presentation like your paper
- **Lead** your audience, **don't read** your audience
- **Practice** in your style in the **time limit**

In Conclusion

- **Structure** your presentation like your paper
- **Lead** your audience, **don't read** your audience
- **Practice** in your style in the **time limit**

And make sure to have a conclusion slide unlike Dr. Ables who never puts one at the end of his presentations, which is incredibly unprofessional, and he never knows when his slides are finished.

In Conclusion

- **Structure** your presentation like your paper
- **Lead** your audience, **don't read** your audience
- **Practice** in your style in the **time limit**

And make sure to have a conclusion slide unlike Dr. Ables who never puts one at the end of his presentations, which is incredibly unprofessional, and he never knows when his slides are finished..

In Conclusion

- **Structure** your presentation like your paper
- **Lead** your audience, **don't read** your audience
- **Practice** in your style in the **time limit**

And make sure to have a conclusion slide unlike Dr. Ables who never puts one at the end of his presentations, which is incredibly unprofessional, and he never knows when his slides are finished...
